

### Risk chart for women who have never smoked\*

Find the line with your age. The numbers next to your age tell how many of 1000 women will die in the next 10 years from each cause of death.

	Vascular disease		Cancer type					Infection			Accidents	Any cause	
Age, y	Heart attack	Stroke	Lung	Breast	Colon	Ovarian	Cervical	Pneumonia	Influenza	AIDS			
20	Fewer than 1 death										2	4	
25											1	5	
30											1	2	7
35											1	2	11
40											1	1	2
45	2	1	1	4	1	1	1	1	2	26			
50	4	2	2	5	2	1	1	1	2	42			
55	7	2	3	6	3	2	1	1	2	66			
60	14	4	5	7	4	3	1	2	2	105			
65	30	10	7	9	6	3	1	4	3	158			
70	52	19	10	10	8	4	1	7	5	247			
75	90	36	11	11	11	4	1	15	7	381			
80	153	62	11	12	14	4	1	30	1	581			
85	221	86	8	12	15	3	1	48	3	771			
90	272	96	5	10	14	2	1	64	5	879			

\*The numbers in each row do not add up to the chance of dying from any reason because there are many other causes of death in addition to the ones listed here.  
AIDS = acquired immunodeficiency syndrome.

### Risk chart for men who have never smoked\*

Find the line with your age. The numbers next to your age tell how many of 1000 men will die in the next 10 years from each cause of death.

	Vascular disease		Cancer type			Infection			Accidents	Any cause																										
Age, y	Heart attack	Stroke	Lung	Colon	Prostate	Pneumonia	Influenza	AIDS																												
20	Fewer than 1 death								5	10																										
25									Fewer than 1 death								5	11																		
30																	1	Fewer than 1 death								2	13									
35																	2									Fewer than 1 death								2	18	
40																	4																	1	Fewer than 1 death	
45	7	1	1	1	1	1	5	39																												
50	12	2	2	2	1	1	1	4	62																											
55	20	4	3	4	2	2	1	4	93																											
60	32	6	5	6	4	3			5	146																										
65	61	12	7	9	8	6			6	221																										
70	93	21	12	11	14	11					7	336																								
75	142	36	15	14	23	22					1	11	494																							
80	196	53	13	16	32	38					1	15	652																							
85	241	67	10	16	37	56	1	19			770																									
90	223	73	6	14	36	74	1	21			828																									

\*The numbers in each row do not add up to the chance of dying from any reason because there are many other causes of death in addition to the ones listed here.  
AIDS = acquired immunodeficiency syndrome.

### Risk chart for women who currently smoke\*

Find the line with your age. The numbers next to your age tell how many of 1000 women will die in the next 10 years from each cause of death.

Age, y	Vascular disease		Cancer					Infection			Accidents	Any cause†
	Heart attack	Stroke	Lung	Breast	Colon	Ovarian	Cervical	Pneumonia	Influenza	AIDS		
20											2	8
25										1	1	10
30	1	1	1	1						2	2	14
35	1	1	2	1						2	2	22
40	3	2	4	2	1			1		2	2	32
45	6	4	10	4	1	1	1	1		1	2	50
50	13	6	21	5	2	1	1	1		1	2	80
55	24	9	36	6	3	2	1	2		1	2	125
60	45	16	65	7	4	3	1	4			2	199
65	50	16	85	9	6	3	1	8			3	301
70	88	30	124	10	8	4	1	16			5	470
75	153	58	137	11	11	4	1	33	1		7	725
80	261	99	136	12	14	4	1	66	3		11	>950
85	375	137	103	12	15	3	1	105	6		14	>950
90	462	154	64	10	14	2	1	140	12		15	>950

\*Calculations for this chart are based on data that use the standard Centers for Disease Control and Prevention (CDC) definition of a smoker: someone who has smoked at least 100 cigarettes in her lifetime and smokes any amount now. The numbers in each row do not add up to the chance of dying from any reason because there are many other causes of death in addition to the ones listed here. AIDS = acquired immunodeficiency syndrome.
